

## Infant feeding and HIV: The Pediatricians Weigh In (Part II of II)

10.09.15 | 11 am PST

What might obstetric and pediatric providers think about when talking to women living with HIV about their options regarding infant feeding? What are some approaches to multidisciplinary care? Using a harm reduction approach, providers from the United States and Canada discuss approaches to navigating from prenatal care to postpartum follow up.

Join our panel for a discussion on the practicalities providers face in advising women living with HIV who express a desire to breastfeed, with a focus on retention in care and reducing HIV transmission risk to infants. The panel will feature:

				
<b>Tess Barton, MD</b> Associate Professor of Pediatrics, Section of Retrovirology & Global Health, Chief Medical Officer, Baylor International Pediatric AIDS Initiative, Baylor College of Medicine; Texas Children’s Hospital	<b>Jason Brophy, MD</b> Clinical Investigator, CHEO Research Institute; Assistant Professor, Department of Pediatrics, Faculty of Medicine, University of Ottawa	<b>Judy Levison, MD, MPH</b> Professor, Departments of OB/GYN and Family/Community Medicine, Baylor College of Medicine; Physician Coordinator, Harris Health System Women’s Program	<b>Mona Loutfy, MD, MPH, FRCPC</b> Associate Professor, Clinician Scientist, and Infectious Disease Specialist, Women’s College Hospital, University of Toronto	<b>Shannon Weber, MSW</b> Director, HIVE; SFDPH CBA Faculty; moderator
<b>Webinar Objectives</b>				
Describe co-management arrangements for pediatricians and OB/GYNs to discuss shared concerns & differences		Discuss approaches to multidisciplinary care for women living with HIV who are considering breastfeeding		Identify online resources for provider and patient support

We will end with a Question & Answer session along with an overview of how your health department can get free assistance on building capacity in high impact HIV prevention. We encourage everyone to follow along and ask questions on Twitter using the hashtag [#SFHarmReduc](#).
